Without limiting the foregoing, no waiver by CUHKMC of any breach by the Successful Tenderer of any provision of the Contract shall be deemed to be a waiver of any subsequent breach of that or any other provision of the Contract.

28.2 No waiver of any provision of the Contract shall be effective unless it is in writing and duly signed by an authorised representative of CUHKMC granting the waiver.

PART VI

TENDER BRIEF

1 Information and Communications Technology (ICT) Vision

1.1 As part of the service strategy, we aim to set up CUHKMC as a “SMART Hospital” with extensive adoption of Health ICT to support patient care and business operations, with a view to create values to patients. The objectives of the ICT-enabled services are:

- a) To improve the efficiency in both clinical and business operations;
- b) To enhance the quality of patient care services through adoption of ICT solutions that proactively assist doctors, nurses, and other healthcare professionals in delivering quality patient care and ensuring patient safety; and
- c) To support the provision of patient-centred care through applications and services that enrich patient experiences and promote patient health.

1.2 In 2016, we conducted a consultancy study to formulate the future ICT Strategy and work plans. As part of the consultancy study, an enterprise ICT architecture framework (Figure 1) has been defined that serves as the framework to guide the realisation of the ICT Strategy. The architecture framework has the following components:

- a) **Application Architecture** to provide a set of interdependent layers for system component interacting in an integrated manner to support various business and service needs;
- b) **Data Integration Architecture** to translate the information requirements for operational performance, clinical audits, clinical research, and management needs from clinical and business support systems, and define what data integration components are needed in the business operation;
- c) **Information Architecture** to provide data and clinical terminology standards to be adopted for data and system consistency and standardisation;
- d) **System Integration Platform** to integrate different layers/components, and exchanges data among them;
- e) **Security Framework** to ensure information confidentiality, integrity, and availability;
- f) **Cloud Architecture** to provide the standards for the usage of cloud services;
- g) **Technology Architecture and Infrastructure** to support the application, information, and system and communication architectures development.

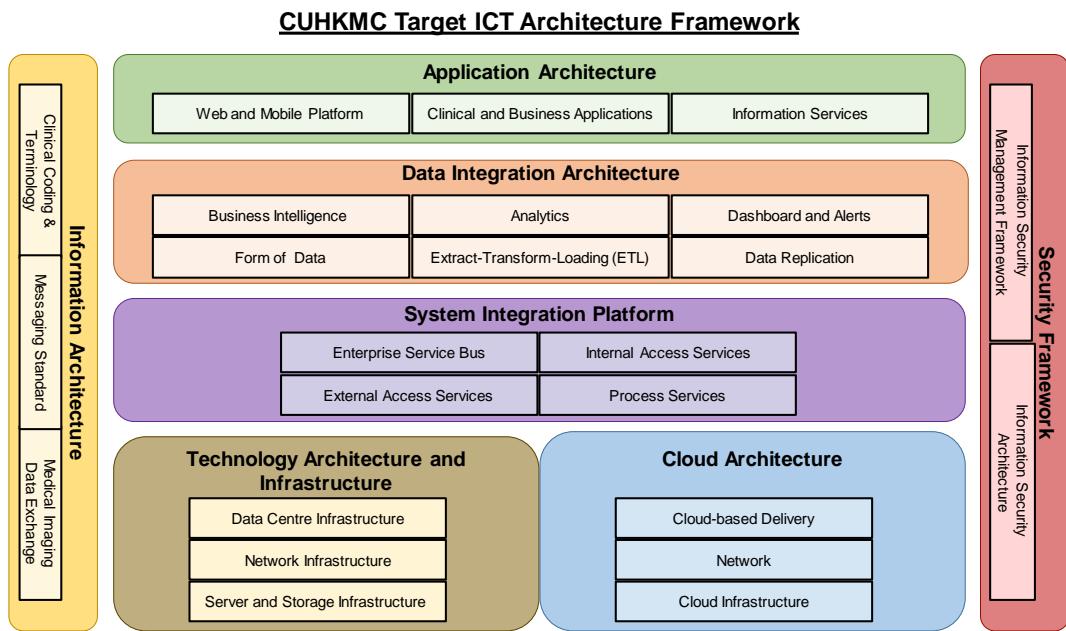

Figure 1 – Target ICT Architecture Framework for CUHKMC

1.3 We shall adopt state-of-art ICT technologies to enhance clinical outcomes of patient care and operational efficiency. Development and implementation of ICT solutions and technologies will commensurate with the phased opening of the hospital, development in services and growth in business.

* Upon commencement of the Contract, CUHKMC will appoint a designated person who will act as the counterpart for the Successful Tenderer for matters in relation to the Contract. CUHKMC will notify the Successful Tenderer in writing for any change in such designated person.

4.2 Business and Functional Requirements

To ensure that all CUHKMC's requirements are met, the table set forth in Schedule 7A outlines, among others, the general requirements and the necessary system specifications and platform features that must be provided.

Please respond to each item with YES, NO, and supplement with detailed information as required. Any alternatives or additional features should be clearly marked.

The key business and functional requirements are specified in Schedule 7A – Compliance to Requirements:

- a) The proposed solution must fulfill all “Mandatory” requirements. Tenderer who fails to fulfill these requirements will result in disqualification.
Tenderer may propose solutions that can meet the “Optional” requirements. CUHKMC reserves the right to accept these optional services / products or not.
- b) Tenderer must indicate whether the proposed solution comply with the stated requirements. Tenderer is also required to provide details about how the proposed solution can meet the requirements or customisation / workaround / other details.

4.3 Architecture and Technical Requirements

Interoperability is essential to support the flow of information among systems and to improve the coherence of systems maintained by CUHKMC. The CUHKMC Target ICT Architecture Framework set out in Figure 1 above aims to define the set of architecture and technical requirements to facilitate CUHKMC systems to communicate and interoperate with other systems, both within CUHKMC and external to CUHKMC, efficiently and effectively. In addition, it promotes and fosters the adoption of open architecture to support the system implementation. By adopting these requirements, CUHKMC systems can ensure interoperability between systems while at the same time enjoy the flexibility to select different hardware, and systems and application software to implement solutions.

On the other hand, CUHKMC strongly encourages the adoption of international IT Security standards and best practices in the industry. The CUHKMC Target ICT Architecture Framework is also supporting the operation of the IT security management to oversee and steer the implementation of the IT security standards and measures for CUHKMC systems. Governing by the IT security framework, proactive steps would be taken in combating threats related to IT security and cyber attacks by continuously monitoring IT security related vulnerabilities and threats, and providing alerts in handling information security incidents and cyber attacks. Moreover, CUHKMC systems are required to implement appropriate data encryption measures to ensure data security, with access restricted to authorized personnel only.

Patients’ health record in the systems amounts to personal data as defined in the Personal Data (Privacy) Ordinance (Cap. 486 of the Laws of Hong Kong) (“PDPO”) and is protected under PDPO. In order to protect the Data Privacy of a person in relation to personal data, the CUHKMC Target ICT Architecture Framework also acts in accordance with the requirements under the Personal Data (Privacy) Ordinance when handling patients’ health record in the CUHKMC systems. For different purposes and at different times, patients may be invited to provide personal data to CUHKMC on a voluntary basis. CUHKMC will specify the collection purpose and intended usage of the personal data when such information is provided and advise how to request access to or make correction of the personal data. Unless permitted or required by law, CUHKMC will not disclose the personal data to any third parties without patients’ prior consent. Tenderer and other contractors that provide and/or provide services in respect of or in relation to any information system or communication system of CUHKMC

shall not access or tamper with, or allow any other person to access or tamper with, any personal data held by CUHKMC.

5 Service Level Agreement

5.1 The Purpose

Service level management aims to ensure that all operational services and performance are measured and executed consistently and professionally.

The Service Level Agreement set forth in this section 5 (“SLA”) describes the service level indicators and the required service levels applicable to the provision of the Maintenance and Support Services. It will form an integral part of the Contract signed between CUHKMC and the Successful Tenderer, supplementing its clauses and conditions.

If the required service levels are not respected, CUHKMC will claim liquidated damages. The application of liquidated damages aims to ensure the proper service delivery to CUHKMC. The liquidated damages will be treated separately and cumulative for the different service level indicators as outlined in Section 5.5, and their amount will be deducted from or off-set against the Price and/or other amounts payable by CUHKMC under the Contract.

No liquidated damages are applied in the case of a situation of "Force Majeure", nor if the problem results from some wrongdoing on the part of CUHKMC or one of its representatives.

Specifically excluded from the calculations of availability and Incident Management are outages caused by:

- Situations of Force Majeure: Circumstances related to nature beyond the Successful Tenderer's reasonable control: hurricanes, earthquakes, and other natural disasters;
- Duration of essential maintenance and scheduled upgrades during scheduled maintenance windows. Such scheduled maintenance windows shall be pre-agreed by CUHKMC with not less than 7 days' prior notice to CUHKMC. CUHKMC may designate blackout periods during which no maintenance is permitted to ensure service continuity. Emergency maintenance outside these scheduled maintenance windows requires prior notification and is limited to critical fixes; and
- Wrong operation of the equipment or service, or delay introduced by CUHKMC.

This SLA will be valid during the Maintenance Period. Any material change to this SLA, adjusting target values or remedies (such as liquidated damages) requires mutual agreement by CUHKMC and the Successful Tenderer and a signed amendment.

5.2 Support Services

The Successful Tenderer must establish and maintain an organisation and process to

provide support for the server infrastructure and container platform to CUHKMC. Support services as part of the Maintenance and Support Services shall include:

- a) diagnosis of problems or performance deficiencies of the server infrastructure and container platform;
- b) a resolution of the incident or performance deficiencies of the server infrastructure and container platform. Support Services must contain the following parts:

Level Support: This refers to user support in incident management in writing (email, Ticket); the Successful Tenderer must process requests sent through the support mechanism at the specialist level.

Continuous Maintenance: This refers to the ongoing support of the system or platform used and the performance analysis. The service will be provided proactively or in response to CUHKMC's requests depending on the task definition. In the event of any known bottlenecks or problems, the Successful Tenderer will actively contact CUHKMC.

Continuous Improvement: The Successful Tenderer also provides constant improvement services, including improvement and further development of the system at the request of CUHKMC. The Successful Tenderer understands these services to include:

- (i) Adapting, improving, and further upgrading the system and platform;
- (ii) Upgrade services for newly defined needs.

Support Services shall include onsite service and support provided via service hotline / email / remote Support. The Successful Tenderer shall comply with the further requirements on Support Services as set out in Sections 5.3 to 5.5 of this Part.

5.3 Service Support Structure

During the agreed service hours, the Successful Tenderer must provide a support team with the right technical and application skills, able to communicate clearly with CUHKMC in the required languages. Contact details (email, telephone) must be provided to CUHKMC. The Successful Tenderer must also set up a ticketing system, plus monitoring and reporting tools for CUHKMC.

5.4 Support Services Time

The Successful Tenderer implements a Service Desk function (hotline & on-site) which CUHKMC users may invoke when they need assistance from the Successful Tenderer. 24/7 round the clock at the delivery of the service.

5.5 Priorities and Reaction Time

CUHKMC will issue a ticket that details the incident/ fault/ request (each a “Ticket”). Each Ticket gets assigned one of the following priority levels:

Incident Priority	Description	Business Impact
1 – Critical	- Major system(s) down - No workaround exists	- Business stopped - User Impact: All
2 – High	- Major system(s) down - Workaround exists.	- Business interrupted - User Impact: Multiple
3 – Medium	- Minor issues; workaround exists - Password changes, security changes	- Workflow interrupted - User Impact: single user
4 – Low	- Minor issues; workaround exists - Configuration changes, security changes	- Workflow inconvenienced - User Impact: single user

CUHKMC initially prioritises when creating the Ticket and may alter the priority during the processing cycle. Based on mutual agreement, the Successful Tenderer may also adjust the priority.

Service Level initial response time and required Service level for resolution:

Incident Priority	Initial Response Time after issue of Ticket	On-site Requirement	Resolution Time after issue of Ticket
1 – Critical	Within 1 hour (24x7)	On-site within 4 hours (24x7)	8 Business Hours
2 – High	4 Business Hours	As required	24 Business Hours
3 – Medium	8 Business Hours	As required	48 Business Hours
4 – Low	24 Business Hours	As required	96 Business Hours

Definitions:

- **Business Hours:** 09:00–18:00 HKT, Monday–Friday, excluding Hong Kong public holidays.
- **Non-Business Hours:** All other times.
- **Hours (24×7):** All hours, including weekends and public holidays.

On-site service shall be provided only if the incident cannot be resolved via service hotline, email, or remote Support. For Priority 1 – Critical incidents, on-site service will follow the timeline in the table above. For Priority 2, 3, and 4 incidents, if on-site service is required, it will be arranged **on the next Working Day after the initial response is provided**, not merely after ticket issuance.

SLA Measurement:

The Initial Response Time and Resolution Time are among the SLAs used to measure the performance of the Successful Tenderer. The Successful Tenderer shall ensure that

they fully comply with the Requirements and the agreed service levels, and shall provide monthly reports containing key performance data as mutually agreed between CUHKMC and the Successful Tenderer for CUHKMC's record and inspection. CUHKMC and the Successful Tenderer shall hold meetings at agreed intervals to review the performance of the Services.

CUHKMC reserves the right to terminate the Contract if the Successful Tenderer fails to meet the Requirements and/or the agreed service levels in relation to the Maintenance and Support Services cumulatively for more than six (6) times over consecutive six (6) months. The corresponding details can be found in the "Termination" clause set out in Part III (Conditions of Contract). CUHKMC may claim liquidated damages from the Successful Tenderer in addition to exercising the termination right.

5.6 Liquidated Damages for SLA Failures

In the event that the Successful Tenderer fails to meet the service levels as defined in this SLA, CUHKMC shall be entitled to claim, and the Successful Tenderer shall pay upon demand by CUHKMC, liquidated damages as follows:

5.6.1 Delayed Incident Resolution

If the Successful Tenderer fails to resolve incidents within the timeframes specified in Section 5.5 of this Part, the following liquidated damages shall apply:

- a) Priority 1 - Critical: 0.05% of the Annualised Contract Sum per hour of delay beyond the 8-Business Hour resolution time, up to a maximum of 5% of the Annualised Contract Sum per incident.
- b) Priority 2 - High: 0.1% of the Annualised Contract Sum per Working Day of delay beyond the 24-Business Hour resolution time, up to a maximum of 3% of the Annualised Contract Sum per incident.
- c) Priority 3 - Medium: 0.05% of the Annualised Contract Sum per Working Day of delay beyond the 48-Business Hour resolution time, up to a maximum of 2% of the Annualised Contract Sum per incident.
- d) Priority 4 - Low: 0.025% of the Annualised Contract Sum per Working Day of delay beyond the 96-Business Hour resolution time, up to a maximum of 1% of the Annualised Contract Sum per incident.

For the purpose of the Contract, "Contract Sum" means the Price for the Contract, and 20% of the Contract Sum is referred to as the "Annualised Contract Sum".

5.6.2 System Availability Failures

If either the server availability or the container platform availability falls below the guaranteed uptime of 99.9% in any calendar month (excluding agreed maintenance windows), liquidated damages of 0.2% of the Annualised Contract Sum shall apply for each 0.1% that system availability falls below the guaranteed uptime, up to a maximum of 10% of the Annualised Contract Sum per month.

5.6.3 Maximum Liability

The total liquidated damages under sections 5.6.1 and 5.6.2 of this Part in any service year for Maintenance and Support Services shall not exceed 15% of the Annualised Contract Sum.

5.6.4 Claim and Payment Procedures

- a) CUHKMC will notify the Successful Tenderer in writing of any SLA failure and claim for corresponding liquidated damages as soon as reasonably practicable, normally within 15 Working Days, after cessation or resolution of the incident.
- b) The Successful Tenderer shall have 10 Working Days to verify and respond to the claim. Should CUHKMC do not receive any response from the Successful Tenderer within the said 10-Working-Day period, the liquidated damages amount as notified by CUHKMC shall be deemed to be final and conclusive and accepted by the Successful Tenderer, save and except that CUHKMC reserves the right to rectify any error in the liquidated damages amount claimed at any time. Any dispute on a claim for liquidated damages constitutes a Dispute which shall be resolved in accordance with Clause 14.3 of Part III (Conditions of Contract).
- c) Upon acceptance or deemed acceptance of the claim amount or agreement or resolution of any dispute regarding the claim, the liquidated damages amount shall be deducted from the next invoice issued by the Successful Tenderer, save in the final year of the Maintenance Period, the Successful Tenderer shall pay all outstanding liquidated damages to CUHKMC to such bank account designated by CUHKMC in cleared funds within 30 days after the said acceptance or deemed acceptance of claim amount or the said agreement or resolution of dispute regarding the claim, as applicable.
- d) If no invoice issued by the Successful Tenderer is due within 30 days, the Successful Tenderer shall issue a credit note for the liquidated damages amount to CUHKMC for set-off against the next invoice issued by the Successful Tenderer upon payment.

6 Acceptance Test

- 6.1 The Successful Tenderer must deliver all the Products and other Deliverables and complete successfully all acceptance testing for the implementation of the Products delivered as a solution in accordance with the provisions of the Contract to the satisfaction of CUHKMC.

6.2 Acceptance Approach

- 6.2.1 Acceptance is conditional upon successful completion of Technical Acceptance Tests conducted on the delivered solution in the operating environment of CUHKMC. The tests shall be witnessed by representatives of CUHKMC and documented with objective evidence, including screenshots, system and audit logs, alarm histories, performance and capacity metrics, and other test artefacts.

Acceptance sign-off shall be performed by an authorised representative of CUHKMC.

6.3 **Acceptance Coverage**

The Successful Tenderer shall demonstrate that the solution satisfies the following acceptance areas, at a minimum:

6.3.1 **Hardware baseline and configuration verification**

Schedule 7A – Compliance to Requirements (Business and Functional Requirements)

All references to “supplier” or “vendor” in this Schedule 7 are references to “Tenderer” or “Successful Tenderer”, as appropriate.

The requirements listed in below table are either marked as mandatory or optional. Tenderers are required to comply with all mandatory requirements as outlined in the table. Tenderers must indicate the extent of compliance of their proposals point by point. If a Tenderer indicates non-compliance with, any disagreement with, or propose deviations from the mandatory requirements, its tender proposal will not be considered and will not be proceeded to price assessment.

"Shall support" indicates that the proposed solution must have the technical capability or feature built into the Products, but CUHKMC does not expect additional professional services or implementation effort specifically for this capability beyond standard setup. The vendor must demonstrate that the capability exists in their solution.

"Shall provide" indicates that the vendor must deliver this capability as part of their proposal, which may include implementation, configuration, and ensuring the feature is operational at handover. This may require professional services or additional implementation effort as part of the project scope.
