不容忽視的症狀

Symptoms You Shouldn't Overlook

若閣下有任何以下的下泌尿路病徵或出現前列腺特異抗原指數(PSA)升高的情況，應及早諮詢醫生意見。
If you experience any of the following lower urinary tract symptoms or have elevated prostate-specific antigen (PSA) level, you are recommended to seek early medical advice.

小便尿柱細弱，排尿時出現困難
Weak stream, difficulty in urination

常有排尿不清的感覺
Sensation of incomplete emptying

日間小便次數頻密
Urinary frequency in daytime

夜尿次數頻密
Need to wake up at night for urination

尿急時難以忍尿
Urgency, sometimes unable to hold the urine

認識風險、為自己做更多

Be Aware of Risks and Do More for Yourself

良性前列腺增生是由於男士受荷爾蒙影響下的生理轉變。增生過程可以導致膀胱出口受到阻塞。這可產生令人困擾的症狀，甚至出現併發症，如膀胱結石、尿瀦留、血尿、尿道感染等，不容忽視。
The pathophysiology of Benign Prostatic Hyperplasia is related to the hormonal changes happened in men. This can cause bladder outlet obstruction, which may lead to bothersome symptoms and even complications such as bladder stone, retention, haematuria, infection.

及早發現及早治療

Early Detection for Early Treatment

前列腺癌是源自前列腺的癌細胞在不受控的情況下不斷生長，繼而轉移，侵略周邊甚至擴散到不同主要器官，對生命產生威脅。然而早期的前列腺癌能透過手術或放射治療有效地作出根治。及時檢查有助及早發現及治療。
Prostate cancer refers to uncontrolled tumor cells proliferation from prostate gland, which may progress and metastasize to adjacent or distant organs, which can be life-threatening. However, with early detection and treatment, the cancer can be potentially cured by surgery or radiotherapy.

定期檢查、維護前列腺健康

Regular Check-up to Safeguard Prostate Health

從病理學說，良性前列腺增生幾乎是每位男士隨着年齡增長都會出現的情況。另一方面，前列腺癌的發病率也同樣隨年齡而增加。這兩種情況的病徵可以很相似，亦可以同時出現，所以定期檢查有助男士了解自己的狀況，維護前列腺的健康。
Nearly all men will develop histological benign prostatic hyperplasia when they grow old enough. While the incidence of prostate cancer is also rising with ageing. These two conditions have similar symptoms and it can happen at the same time, therefore regular check-up is helpful to maintain prostate health.
