# 香港中文大學醫院 輔助生育中心

## CUHK Medical Centre Assisted Reproduction Centre

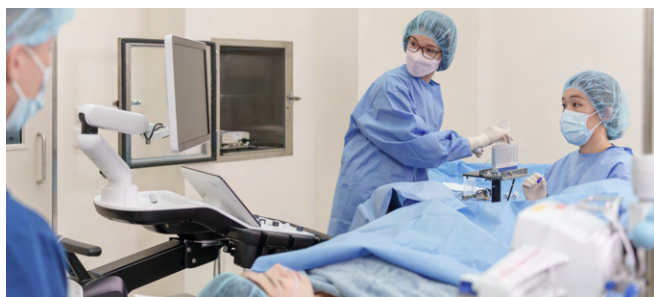

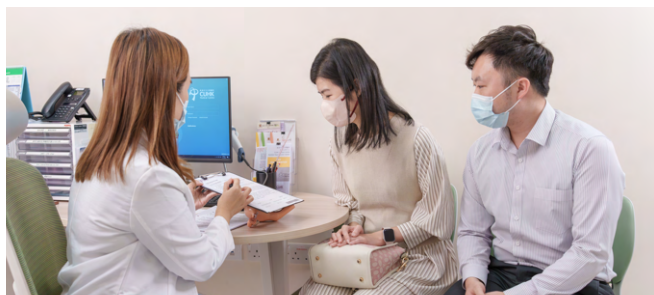

香港中文大學醫院  
**CUHK**  
Medical Centre

輔助生育中心旨在為夫婦提供專業的不育評估、診斷測試及制訂治療計劃。中心配備先進儀器設備。我們的專業團隊由生殖學專家、男科學專家、胚胎學專家和專科護士組成。透過輔助生育技術，例如體外受精、細胞漿內精子注入法、冷凍胚胎移植、宮腔內人工授精，為不育夫婦提供治療。此外，我們亦提供多項專科服務，包括胚胎植入前遺傳學診斷、保存生殖能力（男性可冷凍精子，女士可冷凍胚胎/卵子/卵巢組織）。男科實驗室提供全面的男科不育檢測服務，為有需要的男士評估生育狀況及制定適當的治療方案。

在治療過程中，我們為不育夫婦提供全人的護理和心理支援，希望增加其受孕的機會。此外，中心還為慣性流產夫婦提供專科諮詢及心理輔導。

The Assisted Reproduction Centre aims to provide professional infertility assessment, diagnostic tests and to formulate treatment plans for couples. The centre is equipped with up-to-date equipment. The specialised team is composed of reproductive specialists, andrologist, embryologist and specialty nurses. We provide treatment to the infertility couples with the help of assisted reproductive technology, e.g. In-vitro Fertilization (IVF), Intracytoplasmic Sperm Injection (ICSI), Frozen Embryo Transfer (FET), and Intrauterine Insemination (IUI). For specialised services, we also provide Preimplantation Genetic Testing (PGT), fertility preservation for men (sperm freezing) and women (embryo / eggs / ovarian tissue freezing). The Andrology Laboratory offers comprehensive male fertility testing and other laboratory services to evaluate and treat male infertility.

During the treatment process, holistic care and psychological support will be provided to the infertility couples. We hope to increase their chances of conceiving. Furthermore, the centre also provides specialised consultations and psychological counselling for couples experiencing recurrent miscarriage.

## 我們的服務 Our Services
