

## **Fire Safety in CUHK Medical Centre**

In general, all visiting doctors should be familiar with the means of escape and the evaluation route of respective floor and the building. Respond and act quickly

(a) On hearing of fire alarm:

- a. A general alert announcement would be broadcast over the public address system.
- b. Follow the instructions from the fire safety wardens, security team or delegates of the areas

(b) Discovery of a fire

- a. Raise an alarm by shouting "FIRE" and break/smash the nearest break glass unit to activate the fire alarm
- b. Dial ext. '6999' to notify the security team and call the Fire Services Department at once by dialling '999'

(c) Evacuation Procedure

- a. Evaluate the risk of escaping from the unit and bring along the three useful items for fire escape (mobile phone, keys and wet towel)
- b. Escape through the nearest staircase and do not use the lift
- c. Evacuation to assembly point: Emergency Vehicular Access (EVA) [P/F to 12/F] and Open Area outside Cheng Yu Tung Building [LG/F]

**Assembly point for P/F to 12/F: Emergency Vehicle Access (EVA)**
