樂食智友計劃 Swallowing Well Programme

- 針對懷疑有吞嚥困難的長者而設
Tailor to the needs of elders with potential swallowing problem
- 老人科專科醫生、言語治療師、註冊營養師及老人科護士主理，協助受吞嚥困難的長者及照顧者
Coordinated by geriatrician, speech therapist, dietitian and geriatric nurse to best support elders and their caregivers

樂食智友計劃 Swallowing Well Programme

為協助有需要的長者及家人，香港中文大學醫院推出「樂食智友計劃」，由老人科專科醫生、言語治療師、註冊營養師及老人科護士協助受吞嚥困難的長者及照顧者正視吞嚥困難及相關的長者健康問題。

The "Swallowing Well Programme" organised by CUHK Medical Centre is coordinated by geriatrician, speech therapist, dietitian and geriatric nurse to best support elders and their caregivers in need to address their swallowing and related geriatric problems.

資助計劃 Subsidy Scheme

本計劃承蒙「何善衡慈善基金」的支持及贊助，經本長者門診醫護團隊評估而符合資格之人士可 **免費** 接受由言語治療師進行的吞嚥評估及治療一次。(相等於 港幣 \$1,500 的資助)。

With the generous support and donation from **The S.H. Ho Foundation**, eligible clients confirmed by the Elderly Clinic's medical team can receive a **FREE** swallowing assessment and treatment services conducted by our speech therapist (equivalent to a subsidy of HK\$1,500).

樂食智友計劃 Swallowing Well Programme

香港大約每五人就有一人為長者，與年齡老化相關的疾病如認知障礙症、肌少症、帕金森症、中風等皆有機會引致吞嚥困難問題。根據衛生署的資料顯示，在一些中風的長者當中，有二至四成的患者會有不同程度的吞嚥困難。

With 20% of the Hong Kong population being elders, aging-associated conditions such as dementia, sarcopenia, Parkinson's disease, and stroke can cause difficulty in swallowing. Based on data from the Department of Health, around 20% to 40%, of elderly individuals who have had a stroke, encounter varying degrees of swallowing difficulty.

吞嚥困難除了會阻礙食物安全及有效地由口送到胃內，長遠更有礙營養及水份攝取，引致營養不良、體重下降、抵抗力減弱、影響生活質素。一旦食物或液體誤入呼吸道，便有機會併發吸入性肺炎，嚴重時更可致命，因此吞嚥困難為長者的健康帶來威脅，需要盡早處理。

Besides making a safe and efficient transfer of food from mouth to stomach, dysphagia (swallowing difficulty) affects nutritional intake and water absorption, leading to malnutrition, weight loss, weak immunity, and a poorer quality of life. Once food or liquid enters the airway, aspiration pneumonia could be resulted, and which, in severe cases it would lead to fatality. Therefore, dysphagia is a health risk of the elderly which requires early medical attention.

以下為吞嚥困難的常見病徵 Common symptoms of dysphagia are as follows

- 進食或飲水時容易噎咳
Coughing or choking while eating or drinking
- 嘗試多次吞嚥才可成功
吞下食物
Requiring multiple attempts to swallow a mouthful of food
- 口腔內有食物殘留，引致
口腔異味
Bad odour in the mouth due to food debris in the oral cavity
- 口部肌肉控制減弱，口中的
食物、口水容易流出
Drooling or food spillage due to impaired control of oral muscles
- 進食時食物好像卡在食道
上
Food impacted at the throat
- 營養不良、體重減輕、身體脫水
Malnutrition, weight loss and dehydration

計劃特色 Programme Features

- 針對懷疑有吞嚥困難的長者而設
Tailor to the needs of elders with potential swallowing problem
- 言語治療師、專科護士、註冊營養師靈活搭配，為有需要長者提供一站式評估及治療服務
The team consists of speech therapists, specialist nurses and registered dietitians for holistic diagnostic and therapeutic support
- 院內跨專科團隊支援，可轉介至老人科、耳鼻喉科等專科跟進
One-stop multi-disciplinary support within CUHK Medical Centre. Referral to our medical specialists i.e. geriatrician and otorhinolaryngologist etc. can be arranged for medical assessment if necessary

計劃內容 Programme Content

本計劃承蒙「何善衡慈善基金」的支持及贊助，經本長者門診醫護團隊評估而符合資格之人士可 **免費** 接受由言語治療師進行的吞嚥評估及治療一次。(相等於 港幣 \$1,500 的資助)。

With the generous support and donation from **The S.H. Ho Foundation**, eligible clients confirmed by the Elderly Clinic's medical team can receive a **FREE** swallowing assessment and treatment services conducted by our speech therapist (equivalent to a subsidy of HK\$1,500).

符合資助資格的人士： Eligibility Criteria for Subsidised Services:

70歲或以上長者
Aged 70 or above

目前沒有接受任何受資助的
言語治療服務
Currently not receiving any
subsidised speech therapy service
